

Simplify Employee Reimbursement with a Single Swipe by using a Smart Debit Card!

Smart Debit Cards were developed with this in mind; to allow your employees to pay for their health care, dependent care, or transit expenses with a card that automatically debits their Flexible Spending Account, Health Reimbursement Arrangement or Health Savings Account account for eligible expenses without the hassle of claim forms or reimbursement checks.

Your employees can use their Smart Debit Card for goods and services at qualified locations, including:

- Hospitals
- Physician Offices
- Dental Offices
- Vision Service Locations
- Pharmacies
- Daycare Facilities

The Smart Debit Card works like most debit cards with three distinct differences:

- The Smart Debit Card is limited to specific merchants and eligible expenses.
- The card cannot be used at an ATM or for cash back options.
- There is no PIN, employees must select "credit" as the option for payment when paying for items purchased with the card.
